Application/Control Number: 09/930.036

Art Unit: 2653

1. The following is an examiner's statement of reasons for allowance: As per independent claim 1, the examiner agrees with Applicant's assertions set forth in the response dated 9/29/04 that the prior art of record neither anticipates nor renders obvious the instant combination in a scanning device wherein the control unit admits an electric current to control the electric current in a winding when the winding is situated in a magnetic transition field between two adjacent magnets having opposite directions of magnetization.

With regard to independent claim 8, the prior art of record neither anticipates nor renders obvious the instant combination in a scanning device "characterized in that the guide comprises a single round shaft and at least one bushing provided around the shaft, and wherein the control unit uses a measured mutual position of the two parts of the linear motor to determine a mutual inclination of the two parts about said shaft."

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to David L. Ometz whose telephone number is (703) 308-1296. The examiner can normally be reached on M-W, 6:00-4:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, William Korzuch can be reached on (703) 305-6137. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
